

Excel Project – Phase 2

Questions

- **Which vendors consistently offer the most competitive prices?**

The vendors that regularly offer lower or reasonable prices compared to other vendors.

- **Which vendors provide better delivery performance?**

The vendors that deliver products on time and have fewer delays.

- **Are higher-priced vendors actually providing better quality or reliability?**

Check whether vendors with higher prices also provide better quality or more reliable delivery.

- **Which vendors offer the best overall value for the company?**

The vendors that give a good balance of price, quality and delivery.

- **Which vendors show significant variations in prices over time?**

The vendors whose prices change a lot over different periods.

- **Which vendors supply the largest quantity of products?**

The vendors from whom the company purchases the largest quantities of products.

- **Does the vendor with the lowest price also have good delivery performance?**

Check whether the cheapest vendor also delivers on time and has fewer delays.

- **Which vendors have the lowest average purchase price?**

The vendors whose average purchase price is lower than the others.

Important Questions to answer:

1. **Which vendors offer the best overall value for the company?**

Based on: price, quality and delivery.

2. **Does the vendor with the lowest price also have good delivery performance?**

That directly checks whether choosing the cheapest vendor is actually a good decision.
